

Lifebox is a global nonprofit organization founded to tackle the global crisis of unsafe surgery. Lifebox’s work focuses on three core areas: anesthesia safety, surgical teamwork, and reducing surgical infection.

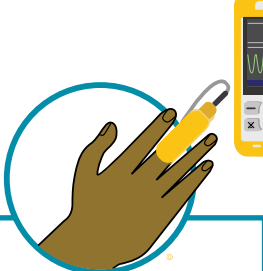

Since its founding in 2011, Lifebox has:

Worked in over **116** countries

Trained more than **14,000** healthcare providers

Made surgery safer for **248 million** patients

THE SMILE TRAIN-LIFEBOX CAPNOGRAPH

Despite being universally mandated in high-income countries, capnographs are nearly entirely absent from low-resource settings. Smile Train and Lifebox are tackling this major gap in anesthesia safety with the Smile Train-Lifebox Capnograph: A high quality, affordable capnograph suited for use in low-resource settings. Lifebox and partner Smile Train are in the process of equipping 650 operating rooms including Benin, Ethiopia, Philippines, and Uganda.

THE LIFEBOX PULSE OXIMETER

A pulse oximeter is a minimum standard for safe anesthesia. Yet operating rooms across the world still lack this essential device—putting millions of lives at risk. Lifebox works to address this gap— distributing oximeters alongside training. Lifebox has delivered over 36,000 pulse oximeters to date.

Give the gift of safe surgery and anesthesia:
